UP TO **80%** LESS WASTE
VOLUME

APPROX. **60%** LESS DISPOSAL
COSTS

The earth is drowning in WASTE!

Threatening mountains of waste are piling up, huge islands of rubbish are drifting across the Pacific, and global plastic production is currently at over 400 million tonnes a year. Plastic and other materials are causing a rapid increase in the volume of waste everywhere, especially in your own home. Most of the time, it's disposed of in rubbish bins, residual waste bags or cardboard boxes. Over time, the sheer volume of rubbish takes up so much space that there is barely any room left to simply live.

A lost cause? No - YOU can do something about it.

WE have the solution:

WASTE SHREDDING

The shredding of accumulated waste is a brilliant innovation, a small step for technology, but a giant leap in our vision of an environmentally friendly future.

The Mx20 MULTI-SHREDDER is an innovative product by Headplanet that effectively compresses plastic, metal, cardboard, wood, Tetra Packs and other waste from restaurants, offices, hotels and commercial enterprises.

The Mx20 is also perfectly suited for shredding pruning debris, green waste and hedge trimmings, as well as various raw materials and vegetables.

WITHOUT Mx²⁰

Your bin is regularly bursting with rubbish. Most of this volume is just AIR.

up to 80% more space

WITH Mx²⁰

Free up all that unused space in your bin by shredding waste with the Mx20.

MULTI-SHREDDER

is suitable for:

PET bottles

Tetra Packs

plastic and metal containers up to 15 litres

Glass

Pruning debris, green waste and hedge trimmings

CDs and hard disks

Cardboard

STRAIGHTFORWARD,
EFFECTIVE,
EASY TO USE...

...this characterizes the operability of the **Mx20 MULTI-SHREDDER.**

Decide which materials you want to shred and sort them accordingly.

Insert your PRE-SORTED waste or raw material through the top hatch and then activate the Mx20 MULTI-SHREDDER.

The shredding process is fully automated and all the waste lands in the container of your choice. This reduces waste volume and lowers your long term disposal costs.

Your advantages

CLEAN SEPARATION of waste and various raw materials instead of bulky waste bags lying around.

One device to shred countless materials, giving you a wide range of efficient applications

Approx. 60% annual SAVINGS in disposal costs due to effective use of empty space in your rubbish bin

SAVE SPACE and restore ORDER in storage rooms

PRODUCT VIDEOS available online or schedule a PRESENTATION via VIDEO CONFERENCE, CONSULTATION & ORDERS available online and by phone

Less waste volume means less lorry journeys, resulting in a DRASTIC REDUCTION IN CO2 EMISSIONS and a positive contribution to the environment.

Highly durable components, making the Mx20 PRACTICALLY MAINTENANCE-FREE
